## ABOUT ME

I am a software developer with 7 years of experience focused on creating and scaling robust applications. My expertise includes refactoring, supporting, and migrating legacy applications to new technologies and modern architectures. I have advanced knowledge in C#, .NET Framework, and .NET Core, as well as SQL and NoSQL databases. In the past 5 years, I have worked as a Full Stack developer, utilizing technologies such as JavaScript, TypeScript, React, Vue, and Angular. I have a strong background in designing and developing projects from conception to delivery, always striving for efficient and innovative solutions.

## EDUCATION

### 2020 - 2021 | ANHEMBI MORUMBI, SÃO PAULO - SP

Specialization in Data Science

### 2015 - 2017 | UNILINS, LINS SP

Analysis and Systems Development

## EXPERIENCE

### OCT 2022 - PRESENT | TAKING (IOB)

SENIOR .NET FULL STACK

Developing new projects with a focus on microservices architecture, handling high access and data volumes, using C# and .NET CORE, NextJS, SQL Server, and MongoDB. Providing support for legacy applications in Java and C#. Delivered a new project for creating accounting content with high uptime, replacing legacy processes involving spreadsheets.

### APR 2022 - OCT 2022 | IT SINGULAR (J&T EXPRESS AND SHOPEE)

SENIOR .NET FULL STACK

Support and development of the JT EXPRESS logistics ERP hub for delivery with Shopee in Brazil, using C#, .NET, and MySQL for Desktop and Mobile applications with MAUI, and Python for integrations with Chinese systems. Also developed an application for door-to-door delivery processes. Unfortunately, the project was canceled by Shopee.

### JAN 2022 - MAR 2022 | GLOBALSYS (GROUP ÁGUIA BRANCA)

MID-LEVEL FULL STACK

Designed and developed the maintenance and contract analysis portal for Grupo Águia Branca, using C#, React, Redis, and PostgreSQL.

## **JUL 2021 - DEC 2021 | META (LOCALIZA)**

### **MID-LEVEL FULL STACK**

Supported legacy applications and designed and developed new projects for the migration and technological transition of Grupo Localiza, working with C# and .NET, .NET CORE, Typescript, and Angular, developing microservices and architectures for new high-availability and real-time applications.

## **AUG 2019 - MAR 2021 | LG (LUGAR DE GENTE)**

### **MID-LEVEL FULL STACK**

Developed and supported e-learning and gaming platforms, working with the game development team using technologies such as C#, Unity3D, VueJS, Python, MongoDB, RabbitMQ, and Redis. Led the team in developing a new platform using the xAPI e-learning framework to capture information and analyze and report training and game results.

## **SEP 2017 - JUL 2019 | LABORATÓRIO SODRÉ**

### **JUNIOR DEVELOPER**

Junior Developer assisting in the development of the new ERP and supporting the old ERP using C# and SQL SERVER. Worked on the migration to the new cloud ERP, serving multiple clients across Brazil. This was my first experience with designing and developing complex and scalable software.

## **SKILLS**

- **Databases:** MongoDB, SQL Server, PostgreSQL, MySQL, OracleDB, Cassandra
- **Development:** Mobile, Microservices, Desktop, Web, RESTful API
- **Version Control:** Git, Gitlab, Github, Gitflow
- **Principles and Patterns:** DDD, SOLID, Creational patterns, Structural patterns, Behavioral patterns
- **Frameworks and Libraries:** EF Core, Dapper, React, NextJs, Angular, VueJS, xUnit, TDD
- **Tools and Technologies:** Docker, Linux, Azure DevOps, Kubernetes
- **Programming Languages:** C#, Typescript, Rust, Python, JavaScript
- **Languages:** Conversational English

## **EXTRA-CURRICULAR**

### **ENGLISH EXCHANGE PROGRAM - TIMES IDIOMAS, ORLANDO, FL (April 2024 - May 2024)**

Participated in an exchange program in Orlando, FL, where I had four weeks of intensive English classes with native teachers, aiming to improve fluency and comprehension of the language.
